

TOTAL TEAM MANAGEMENT SUITE

The OperationsXchange Total Team Management Suite consolidates and delivers technology, tools, resources, communications, and support to personnel across any organization. It's a highly configurable and visual communications hub, technology resource manager, reporting solution, and launch pad to existing tools.

The OperationsXchange suite provides one-stop access to all of your organizations' applications, documents, and resources, freeing up time to focus on more important goals. Imagine everything you need to run your team in one place, accessible from anywhere, and completely configurable to suit your organization's evolving needs.

The OperationsXchange suite solves logistical and administrative pain points within your organization:

- Secure, cloud-based storage protects proprietary information from unauthorized users
- One-stop access to all applications and documentation, providing orderliness and accuracy for all team-based and administrative tasks
- Customization options allows you to include elements critical to your organization
- A mobile and digital database allows permitted users to access information from anywhere in the world, allowing them to work from home, the road, the airport, or elsewhere

CONFIGURABLE

ORGANIZED

CENTRAL COMMUNICATION HUB

Easily communicate with your entire team with the suite's communication tools. Post team-wide announcements and require confirmation your team has read it, or put a message up for other team members to read and respond to. Use it to communicate with a company-wide team, or with smaller teams within the larger group.

DIGITAL ASSET MANAGEMENT

The suite provides one-click access to all critical touch points and information within your organization. You can link to other applications, databases, standard operating procedures, policies, announcements, flow charts, videos, images, training materials, schedules, and more.

CONFIGURABLE

The suite allows you to configure dashboards and site layouts, add links to a new technology or toolset in your arsenal, and reposition site widgets to optimize information access, consumption, and sharing. You can set up multiple team profiles and determine what data you want accessible to just one team, multiple teams, or the entire organization.

DASHBOARD REPORTING

See what matters most to you at a glance. Select the reports you want to see on the site every day. Instantly launch standard reports designed to answer your most common questions, or create custom reports, as you uncover new ways to leverage your data.

SECURE

Manage user permissions confidently and seamlessly. The suite allows you to determine the level of access that personnel will receive based on job role, group membership, or individual need. We provide a comprehensive solution for database security, encompassing various measures to assess and combat vulnerability.
